Author/title index to material published - 1971

The Application of numerical control turning machines for small batch production with special reference to toolmaking (Mason). October, 424.

Assessing the capabilities of metal cutting machine tools (Koenigsberger, Cowley, Burdekin). June, 248.

BAIRSTOW, K. C. Selection of machine tools—the user. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") March, 93.

A banker's view (Rootham). June, 269.

BROSAN, G. S. The changing educational requirements of the chartered production engineer. June, 227.

BURBIDGE, John L. Production flow analysis. April/May, 139.

BURDEKIN, M., KOENIGSBERGER, F. and COWLEY, A. Metal cutting machine tools. June, 248.

Capital expenditure—an accountant's point of view (Watts). November, 476.

Capital investment (Grey). (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") February, 51.

CASELTON, S. A history of the Institution. June, 199.

A case study in quality control of parts produced by numerical control machining (Smith). August, 332.

The challenge of capital (Tribble). October, 432.

The changing educational requirements of the chartered production engineer (Brosan). June, 227.

Chemicals unlimited (Glenn). (The 1970 James N. Kirby Paper.) July, 293.

CLASSY, D. S. and HALLEWELL, E. N. Pantograph diamond dressers. September, 386.

Cold isostatic pressing (James). December, 515.

Co-operation among engineers (Puckey). July, 299.

CORLETT, Professor E. N. People in industry—the contribution of industrial ergonomics. April/May, 165.

COWLEY, A., KOENIGSBERGER, F. and BURDEKIN, M. Metal cutting machine tools. June, 248.

Current user experience (Gifford). (The 1971 Lord Sempill Paper.) August, 325.

DAVIES, B. The future of the manufacturing system. June, 233.

De BARR, A. E. The development of numerical control—past, present and future. September, 372.

De BARR, A. E. Machining data—a feasibility study and the problems involved in improving machining conditions in British industry. December, 504.

Design, operations and maintenance—the designer (Harris).

Design, operation and maintenance—the user (Emms). (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") March, 98.

The Development of numerical control—past, present and future (De Barr). September, 372.

DREW, H. E. Quality—its origin and progress in defence procurement. (The 1971 George Bray Memorial Lecture.) November, 462.

EMMS, D. J. Design, operation and maintenance——the user. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") March, 98.

The engineer in industry and the new Industrial Relations Bill (Stuchbery). March, 91.

FEILDEN, CBE, FRS, Dr G. B. R. Quality through standards. (Golden Jubilee Standards Lecture.) June, 218.

FLETCHER, E. New dimensions in industrial relations. June, 258.

The future of the manufacturing system (Davies). June, 233.

A general purpose fluidic sequential control simulator (Scott-Howes and Pammell). February, 58.

GIFFORD, E. W. H. Current user experience. (The 1971 Lord Sempill Paper.) August, 325.

GLENN, Sir Archibald. Chemicals unlimited. (The 1970 James N. Kirby Paper.) July, 293.

GREY, C. J. Capital investment. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") February, 51.

HALLEWELL, E. N. and CLASSY, D. S. Pantograph diamond dressers. September, 386.

HARRIS, H. G. Design, operation and maintenance—the designer. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") March, 102.

HARRISON, CBE, B. C. Overseas tour by the President-elect. October, 420.

HAWKYARD, J. B. and JOHNSON, W. Recent developments in metal forming. June, 239.

A history of the Institution (Caselton). June, 199.

HÖLIN, N. A. TiC coated cemented carbides—their introduction and impact on metal cutting. April/May, 153.

HOUSTON, J. D. The human factor of machine tool investment. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation." February, 53.

HOWARD, W. P. The need and responsibility to communicate. (The 1971 Viscount Nuffield Memorial Paper.) July, 281.

Human Engineering (Robens of Woldingham). (The E. Percy Edwards Paper 1971.) April/May, 160.

The human factor of machine tool investment (Houston). (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") February, 53.

The Hungarian machine tool industry (Schofield). July, 303.

Investment appraisal (Stevens). June, 261.

JAMES, P. J. Cold isostatic pressing. December, 515.

JOHNSON, W. and HAWKYARD, J. B. Recent developments in metal forming. June, 239.

KOENIGSBERGER, F., COWLEY, A. and BURDEKIN, M. Metal cutting machine tools. June, 248.

KOENIGSBERGER, F. Report of the summing up. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") March, 104.

Machining data—a feasibility study and the problems involved in improving machining conditions in British Industry (De Barr). December, 504.

MANSELL, B. The use of computers in manufacturing companies. (The 1970 Sir Alfred Herbert Paper.) January, 17.

MASON, M. The application of numerical control turning machines for small batch production with special reference to toolmaking. October, 424.

MITCHELL, SIR STEUART. Opening Address. Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation." February, 48.

The need and responsibility to communicate (Howard) (The 1971 Viscount Nuffield Memorial Paper). July, 281.

New dimensions in industrial relations (Fletcher). June, 258.

NORMAN, K. W. Selection of machine tools—the maker. (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") February, 55.

Overseas tour by the President-elect (Harrison). October, 420.
Pantograph diamond dressers (Hallewell and Classy). September, 386.
People in industry—the contribution of industrial ergonomics (Corlett). April/May, 165.
Production flow analysis (Burbidge). April/May, 139.
Production ratios—measuring the basic factors of productivity (Sanders). March, 107.
PUCKEY, SIR WALTER. Co-operation among engineers. July, 299.
PUMMELL, D. and SCOTT-HOWES, P. A general purpose fluidic sequential control simulator. February, 58.
Quality—its origin and progress in defence procurement (Drew). (George Bray Memorial Lecture 1971.) November, 462.
Quality through standards (Feilden). (Golden Jubilee Standards Lecture.) June, 218.
Recent development in metal forming (Johnson and Hawkyard). June, 239.
ROBENS OF WOLDINGHAM, THE RT. HON. LORD. Human Engineering. (The E. Percy Edwards Paper 1971.) April/May, 160.
The rôle of information in library services (Watts). June, 270.
The rôle of productivity agreements (Ward). August, 341.
ROOTHAM, J. StJ. A banker's view. June, 269.
SANDERS, A. J. Production ratios—measuring the basic factors of productivity. March, 107.
SCHOFIELD, Dr. R. E. The Hungarian machine tool industry. July, 303.
SCOTT-HOWES, P. and PUMMELL, D. A general purpose fluidic sequential control simulator. February, 58.
Selection of machine tools—the maker (Norman). (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") February, 55.
Selection of machine tools—the user (Bairstow). (Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation.") March, 93.
Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation" (Opening Address) (Mitchell). February, 48.
Seminar on "Machine Tools—Maker and User Views on Investment and Utilisation" (Report of the summing up) (Koenigsberger). March, 104.
SMITH, I. R. A case study in quality control of parts produced by numerical control machining. August, 332.
STEVENS, P. R. Investment appraisal. June, 261.
STUCHBERY, A. L. The engineer in industry and the new Industrial Relations Bill. March, 91.
STUCHBERY, A. L. What price progress? (The Golden Jubilee Presidential Address.) June, 193.
TiC coated cemented carbides—their introduction and impact on metal cutting (Hölin). April/May, 153.
TRIBBLE, N. R. The challenge of capital. October, 432.
The use of computers in manufacturing companies (Mansell) (The 1970 Sir Alfred Herbert Paper.) January, 17.
WARD, C. J. The Rôle of productivity agreements. August, 341.
WATTS, E. Capital expenditure—an accountant's point of view. November, 476.
WATTS, V. C. The rôle of information in library services. June, 270.
What price progress? (Stuchbery). (The Golden Jubilee Presidential Address). June, 193.

Subject index to material published - 1971

Capabilities of metal cutting machine tools: Assessing the, *248.*
Capital expenditure—An accountant's point of view, *476.*
Capital investment, *51.*
Capital: The challenge of, *432.*
Communicate: The need and responsibility to, *281.*
Computers in manufacturing companies, *17.*
Co-operation among Engineers, *24, 299.*
Diamond dressers: Pantograph, *386.*
Design, operation and maintenance—The Designer, *102.*
Design, operation and maintenance—The User, *98.*
Educational requirements of the Chartered Production Engineer: The changing, *227.*
Ergonomics: People in industry—The contribution of industrial, *165.*
Fluidic sequential control simulator: A general purpose, *58.*
